

YOUR CHARITY \$\$\$... **WHERE AND HOW FAR** **DO THEY GO?**

Bhola Island location

95% to Bangladesh... In Australia Fred Hyde Schools is totally staffed by volunteers.

In Bangladesh.... Just 6% is spent on administration, the rest is used for our core purpose...running 40 primary schools and 18 kindergartens to provide precious education for the children.

WHAT WE DO

Education gives children a chance at a better life, wherever they are born. In rural Bangladesh, education enables children to make choices that their illiterate parents could never have made.

Our 40 schools and 18 pre-schools are located in the villages and rice paddies of Bhola Island, a large remote mud island in the Ganges river where very poor people live.

We employ 175 dedicated teachers in our schools. Some teachers are employed on the outlying islands – yes, even more remote than Bhola Island. We pay them a small “remote” allowance. We have a team of relief teachers to cover leave. There is an administration team of 7, one located in Dhaka, the others in the main office.

YES YOU CAN

Our legendary cost-efficiency puts the power in your hands.
You can make a difference today.

Support a Student

On average, it costs only AUD\$78 a year to educate one student.

Empower an Educator

It costs only AUD\$2,400 a year for a full-time primary school teacher, or just \$200 per month. That's \$10 per working day !

Power up a Pre-school

It costs only AUD\$2,700 a year to run a pre-school for 30 kindergarten age children.

Help us help them when there's a health emergency

Sometimes the students (and their parents) need medical help which is not available on the island. They are so poor they can't afford the trip to Dhaka for the cost of the treatment. We have sourced some pro bono treatment, but have also helped them financially. It's life changing, as you can see..... Any donation helps us to continue this work

Sponsor a School

It costs only AUD\$12,000 a year to run a whole primary school for 200 students.

Donating is easy....

Repair and replace an existing school

The old tin schools Fred Hyde built in the 90s have suffered the ravages of time and the elements. We have begun replacing those schools, but with bricks, concrete, electricity, fans and insulation, to make the learning more comfortable. School equipment (tables, chairs, cupboards, resources etc) is constantly in need of replacement. Books are provided free by the Bangladesh Government. It costs, on average , AUD\$18000 to completely replace a school. A yearly donation of AUD\$1000 would ensure a school's equipment is kept up to date.
